Fake news is defined as deliberately false or misleading information presented as news. It is often spread through social media and other online platforms, and can have a significant impact on public opinion. Fake news can be used to promote political agendas, spread propaganda, or simply generate clicks and revenue.

The spread of fake news is a major concern for educators. In the past, students were taught to rely on traditional sources of information, such as newspapers, magazines, and television. However, the digital age has made

it easier than ever for anyone to create and publish content, and this has led to a proliferation of fake news.

Teaching critical thinking and media literacy skills is essential for helping students to identify and resist the spread of fake news. Critical thinking skills help students to evaluate the credibility of sources, identify biases, and make informed decisions about the information they consume. Media literacy skills help students to understand how the media works, and how to use it to stay informed and make informed decisions.

This book provides a comprehensive guide to teaching critical thinking and media literacy skills in the digital age. It includes lesson plans, activities, and resources that can be used to help students develop the skills they need to resist the spread of fake news.

Chapter 1: The Problem of Fake News

This chapter discusses the problem of fake news and its impact on society. It provides an overview of the different types of fake news, and how it is spread through social media and other online platforms.
