Given the high costs of war, it is clear that America should do everything in its power to avoid future conflicts. The authors offer a number of specific

recommendations for how to do this, including:

- **Invest in diplomacy and international cooperation.** The United States should work to build strong relationships with other countries and to resolve disputes peacefully.
- **Reduce the size of the military.** The United States has one of the largest militaries in the world. This military spending is a drain on the economy and can make other countries feel threatened.
- **Promote democracy and human rights.** Democratic countries are less likely to go to war. The United States should support democracy and human rights around the world.
- **Educate the public about the costs of war.** The American public needs to understand the high costs of war, both in terms of human life and economic resources.

The authors of this book believe that America can avoid war and keep the peace. They offer a number of concrete recommendations for how to do this, and they urge Americans to take action to make these recommendations a reality.
